

## Presidents Report – July 23, 2026

Our trail crew is on summer hiatus. Not surprisingly, we have been busy working on the Puncheons Project and Dave Edwards has led a crew out to the Channel Islands. We are blessed to have such a dedicated crew and should never miss an opportunity to thank them for the work they do.

It was delight to see the crew working to prepare the lumber for installation on Saturday. Jerry used a model of the puncheon to provide a visual for the final product. They cut and drilled piles of lumber, tasks that would appear to be simple. Each person helped by measuring, cutting or drilling. The work was collaborative, and tips were exchanged that proved useful in obtaining consistent cuts.
